RECOGNITION

Startup Village 2026
Resident, Superteam India

Solana Superdevs
Fellowship

WHAT I BRING

Dense interfaces
Order books and trading terminals, where legibility is the product.

Full stack, not handoff
Design, frontend and backend, shipped by one person.

Solana depth
Wallets, relayers, routing engines, validator tooling.

OPEN SOURCE

12 merged pull requests to **Zero**, the open-source Gmail alternative, and **Solix**, Solana's universal data bridge. One open at **Cal.com**.

WRITING

Dissecting Complex Interfaces
Density in financial UI

ReVanced
The art of reverse engineering

STACK

AI-native
Claude, Claude Code, ChatGPT. I work agent-native, so the language a problem calls for is no longer the constraint on taking it.

Traditional
TypeScript, Rust. React, Next.js, Motion. Node.js, Express, Solana, wallet and relayer infrastructure. PostgreSQL, Prisma, Drizzle, MongoDB. Docker, Git.

EDUCATION

BCA
Indira Gandhi National Open University, 2022 – 2025

PROFILE

I design and build the whole product: interface, backend and the on-chain plumbing underneath. My specialism is dense financial software: trading terminals, wallets, exchanges, where complexity is the product and legibility is the hard part. I like to dissect and redesign the hardest screens in crypto, the ones carrying the most data, and write about why they fail.

EXPERIENCE

Design & Frontend Engineer
Nov 2025 – Nov 2026

X2C.fun, Web3 gaming studio · Remote

Managed design across the studio's games and surfaces: NFT marketplace, mini apps, casino games, the player dashboard and the company site. Those titles have drawn **63,000+** players, **346,000+** plays and **$60,000+** in revenue.

Engineer
Jun – Aug 2026

Swish.cash, privacy consumer app on Solana · Remote

Decoupled the auto-routing engine, SDK and relayer out of the Next.js app into a standalone backend, then moved web and mobile onto it as one shared service. Volume went from **$4,000** to **$10,000** across those months, and has since passed **$100,000**.

Full Stack Developer
2025 – 2026

Freelance

> **Food For Thought Fest.** Designed and built the site for South Asia's culinary festival, curated by the South Asian Association for Gastronomy: **150,000+** food enthusiasts, **150+** celebrity chefs, **15+** countries. Credited on it as technology partner.

> **Ascomp INC.** Designed and built the CRM for India's biggest projector provider to PVR Cinemas, run by its project engineers and managers for maintenance and AMCs, with custom forms, automated workflows and payment tracking.

> **Haute Services.** Designed and built the brand site for a luxury Delhi consultancy running since 2009 across hospitality, lifestyle events and art advisory. Clients include Taj Palace, JW Marriott and Pernod Ricard.

> **Spin Vacations.** Travel site with a Sanity trip-management CMS, taking an offline agency online.

SELECTED WORK

PerpExchange
GitHub

A crypto perpetual futures exchange built from scratch: matching engine, margin and liquidation mechanics.

Embedded Wallet
GitHub

Privy-style embedded wallet infrastructure in Rust: FROST threshold signatures across three MPC nodes, so a user signs in with Google and never handles a key.

Phoenix Redesign
faahhad.com

Self-directed rebuild of the largest perp futures exchange on a fully on-chain order book, argued panel by panel: control surface, chart, order book.

Backpack Futures
faahhad.com

Self-directed mobile redesign of crypto and US equity perps, cross-margined. The product carries **$450B** traded across **150+** countries.

"Design is the fundamental soul of a man-made creation that ends up expressing itself in successive outer layers of the product or service." — Steve Jobs
